

**Are you confident you are being informed of the best solution when building your new home?**

**GLASS & WINDOW SOLUTIONS**

**We appreciate that you want your home to be free of potentially damaging leaks around your windows and doors.**

That's why the WeatherTight™ range has been designed to provide an affordable solution for residential joinery and addresses many of the inherent design flaws associated with older joinery that contributed to leaking buildings. In fact, WeatherTight™ was designed in direct response to the leaky building crisis.

### **WHAT IS WEATHERTIGHT™?**

WeatherTight™ is a residential joinery suite. As the name suggests, WeatherTight™ keeps water where it should be, outside your home. It achieves this through a combination of smart drainage design and clever jointing of joinery design.

## **WEATHERTIGHT™ Keeping water where it should be - outside your home**

### **BENEFITS AT A GLANCE**

Unique systems for outstanding weather tightness:

- Advanced drainage designs drains water away
- Stronger, tighter joints
- Fewer frame penetrations where leaks can originate
- Torsional corner blocks for stronger, more secure doors
- Designed for double glazing, with the ability to provide the right glass solution for your requirements.
- Multiple window and door configurations available

### **Innovative products to broaden your options - The WEATHERTIGHT™ Range**

- Awning & Casement Windows
