

GLASS & WINDOW
SOLUTIONS

Retrofit Double Glazing

Glass & Window Solutions specialise in the replacement of double glazed units into existing aluminium single glazed windows.

A simple process of replacing the original beads and sashes with new double glazing profiles. By replacing the existing single glass with new double glazing, you gain a warmer, quieter and more cost effective home to heat in winter, with a reduction of annoying condensation, so common on single glass panes.

We also offer this service for existing timber windows, by routing out the existing rebate, we insert and seal the new double glazed units back into the existing timber joinery, keeping the classic appearance, but enhancing the already efficient thermal performance timber offers.

The change in season highlights the deficiencies of single glazing, now is the right time to replace your thermally ineffective single glazing with new double glazing. Enjoy the benefits of a more comfortable home, while adding resale appeal and security to your home.

Contact our Glass Association of New Zealand approved standards advisor for peace of mind assurance that you will receive the right performing products for your life style requirements that will comply with the New Zealand safety standards.

Replacement/Insert Windows & Doors

Paint peeling from your windows and you're sick of repainting? Condensation and drafts a problem? Replacement aluminium windows are a cost effective solution providing new home window and door performance to your existing home. Glass & Window Solutions use the Nulook "WeatherTight™" window joinery system. As the name suggests, WeatherTight™ keeps water where it should be - outside your home. It achieves this through a combination of smart drainage design and a clever jointing of joinery design. We appreciate that you want your home to be free of potentially damaging leaks around your windows and doors. That's why the WeatherTight™ range has been developed.

In fact WeatherTight™ was designed in direct response to the leaky building crisis.

Aluminium & Glass Balustrades

Exceptional quality and style in a wide range of designs, Glass & Window Solutions aluminium and glass balustrades can meet your safety needs while enhancing your home. Custom made to suit virtually any deck shape, including curved, our balustrades provide durable aluminium solutions to meet your requirements.

Our sales representative will meet with you to discuss the styles and options available to ensure you receive the system that will best suit your needs.

Frameless Glass Balustrades

By utilising a prestigious range of frameless glass balustrade systems, we will preserve your treasured view or compliment modern architecture with the ultimate balustrade styling. Exceptional quality is incorporated in the product design. Custom made to suit virtually any deck shape, Glass & Window Solutions frameless glass balustrades provide a premium solution to meet your requirements.

For options and pricing, our Glass & Window Solutions sales representative can work with you and help assist with choosing the right product for your requirements.

Frameless Glass Showers

The addition of a designer frameless glass shower to your bathroom lifts the appearance of the room while also giving you the ability to have an individually designed shower to suit your own particular needs.

GWS offer a range of hardware and design options specific for your needs, from a simple toughened glass screen to a floor to ceiling option with hinged or sliding doors. We can price options from your plans or meet you on site to assist with the design.
