

Are you confident you are being informed of the best solution when upgrading your windows?

GLASS & WINDOW
SOLUTIONS

Retro Fit Double Glazing - A warmer more comfortable home for you and your family

Glass & Window Solutions specialise in the replacement of double glazed units into existing aluminium single glazed windows.

By replacing the existing single glass with new double glazing, you gain a warmer, quieter and more cost effective home to heat in winter, with a reduction of annoying condensation, so common on single glass panes.

We also offer this service for existing timber windows, by routing out the existing rebate, we insert and seal the new double glazed units back into the existing timber joinery, keeping the classic appearance, but enhancing the already efficient thermal performance timber offers.

Enjoy the benefits of a more comfortable home, while adding resale appeal and security to your home.

Retro Fit Double Glazing or Replacement Windows? What is the best solution for you?

Replacement/Insert Windows & Doors For a warmer, drier and healthier home

Paint peeling from your windows and you're sick of repainting?
Condensation and drafts a problem?

Replacement aluminium windows are a cost effective solution providing new home window and door performance to your existing home.

Glass & Window Solutions offer a wide range of window & door configurations which gives the ability to design windows & doors to meet the independent requirements of your project,

Glass & Window Solutions use the Nulook **"WeatherTight™"** window joinery system. As the name suggests, **WeatherTight™** keeps water where it should be - outside your home. It achieves this through a combination of smart drainage design and a clever jointing of joinery design. We appreciate that you want your home to be free of potentially damaging leaks around your windows and doors. That's why the **WeatherTight™** range has been developed.

Contact us today to find out the best solution for you.
